Summary

Mathematics graduate with strong analytical foundation and hands-on experience in Python, machine learning, and data visualization. I help teams understand complex datasets through statistical analysis and dashboard creation, with proven ability to identify patterns in academic research and collaborative projects.

Education

Jacksonville University, Jacksonville, FL
Bachelor of Science in Mathematics, Graduated May 2nd, 2026 with University Honors

- Honors & Scholars Program
- University GPA: Cumulative 3.73 – Magna Cum Laude

Master of Science in Applied Business Analytics, Anticipated Graduation 2027

Academic Projects

- Conducted academic research on prime parking functions in combinatorics, analyzing mathematical patterns and statistical relationships
- Developed multiple machine learning projects analyzing datasets in Python, creating data visualizations and dashboards to present findings
- Executed data manipulation projects to analyze complex datasets
- Developed three small-scale games utilizing Java for interactive applications

Technical Projects

- **Settlers of the Sky (JavaScript, Node.js, Socket.IO, three.js):** Built and deployed a real-time multiplayer strategy game for 2–6 players with a 3D three.js board, a server-authoritative rules engine, a full expansion ruleset, configurable house rules, 3D room scenes with seated player avatars, and automated tests that simulate complete games
- **ATLAS (Python, OpenAI API, SQLite):** Designed a multi-agent AI assistant with tool permissions, persistent memory, audit logging, and a task scheduler; automates job-search workflows with human approval before any submission, backed by 2,400+ automated tests
- **Broken Blade (Godot 4, GDScript, Python):** Building a complete metroidvania (82 rooms, ten boss fights, an ending) for an eventual Steam release, with ability-gated level design, responsive platforming and melee combat, a reachability checker, and an automated smoke test that builds every room and boss

Skills

- Programming Languages: Python, Java, C++, JavaScript
- Data Analysis & Statistics: Descriptive statistics, Data manipulation, Machine learning
- Tools & Platforms: Excel, MySQL, Git, Google Colab, Data Studio
- Technical Skills: Academic research, Data visualization

Work Experience

Wilkinson Landscaping Contracting LLC, Hunt Valley, Maryland
Stone Worker and Lawn Maintainer, May 2024 – Present (Seasonal)

- Constructed paths and structures to enhance outdoor spaces
- Executed ad hoc landscaping projects to meet client needs

Barrett's Grill, Hunt Valley, Maryland
Host, *Food Runner*, *Server*, July 2022 – December 2022

- Welcomed customers and coordinated reservations for service efficiency
- Facilitated communication between kitchen and staff for smooth operations

GREENIX Sales, LLC and Dish One Satellite LLC, Michigan, Iowa, and Kansas
Sales Representative, Summers 2021 and 2022

- Achieved record sales introducing Dish services to new customers and promoted pest control services through direct customer engagement

Campus Involvement & Leadership

Jacksonville University: Pi Mu Epsilon math honor society and Order of Omega (2025–present); Sigma Chi Fraternity (2023–present); Math Society, Physics Society, and Chess Club (2023–present)
